

DROIDRUSH 2019

ABSTRACT SUBMISSION GUIDELINES

The abstract submission is mandatory for participation in DroidRush 2019.

This step must be made after registering your team on google form shared earlier on Android MNNIT fb page. In the abstract document, you have to provide :

1. Team information(Team name and names of each member).
2. A small description of the problem statement you're working on (Maybe some special name you have thought for your app).
3. The process flow of your app i.e. how your app is going to tackle the problem and its phases. You may mention the classes, libraries, APIs and other resources you are thinking of using.
4. The features you have thought of implementing.
5. The design - visual UI of your app, which you can make by hand or by any tools available online. You can also add your screenshot of your app if you have completed something.
6. We also remind you that the teams from 3rd year must also include class diagrams in their abstracts.
7. Keep the abstract short and precise.We only need the useful information.
8. Since an abstract is a way of defining your ideas in a short and precise manner, ensure you make an effective one. The abstract also has some weightage in DroidRush 2019.
9. We only need a rough estimate of what you are planning to do and which features you are planning to implement. You can add or delete the features later on as per your wish.

You are required to submit the Abstract in a pdf format.

Filename : "TEAM NAME_YEAR_BTECH/MCA"
(for e.g.TEAM3_3rd_btech)

ALL THE BEST!!
